Neeraj M R

Frontend React Developer
+91-8129390516 | neerajramachandran30@gmail.com | LinkedIn

Summary

React Developer with 4 years of experience building scalable web applications using React, TypeScript, Node.js, and AWS. Proficient in writing maintainable code, optimizing frontend performance, and integrating robust backend services.

Skills

Languages: TypeScript, JavaScript(ES6+), HTML, CSS
Frontend: React, Next.js, Redux Toolkit, RTK Query, Tailwind CSS
Backend & Cloud: Node.js, AWS (Lambda, S3, Dynamodb, Cognito)
Testing: Vitest, React Testing Library
Tools: Git, GitHub, RESTful APIs, Websocket

Experience

Full-stack Engineer **Oct 2022 – Present**
Tata Consultancy Services Kochi *React.js, TypeScript, Node.js, AWS Lambda*

- Leveraged **AWS Kiro** to accelerate code and unit test development through structured prompting and validation, while maintaining engineering control over architecture and code quality
- Conducted rigorous performance testing and profiling to identify rendering, network, and bundle-related bottlenecks, implementing caching and optimization strategies to improve application responsiveness and **Core Web Vitals**
- Built and structured scalable frontend state management using Redux Toolkit and RTK Query, simplifying complex asynchronous workflows through caching and optimistic updates for responsive enterprise dashboards
- Integrated and optimized **RESTful APIs**, collaborating closely with backend engineers, clients, and cross-functional teams in **Agile** sprints to resolve issues, refine requirements, and deliver reliable production releases
- Designed and maintained AWS-native **CI/CD** pipelines using CodeCommit, CodeBuild, CodePipeline, S3 and CloudFront, automating testing, artifact creation, and controlled deployments across environments
- Built a monorepo-based UI component library adopted across 4 enterprise applications, reducing duplicated UI development and improving design consistency across products

Projects

TCS AI VX Studio Ops

- Developed and deployed scalable backend services and REST APIs using Node.js, integrating them with React application
- Architected state management (Redux Toolkit, RTK Query) to handle complex async workflows and real-time data updates
- Engineered scalable frontend patterns for media editing, moderation, localisation workflows

CCIM Enterprise Portal

- Partnered across design and backend teams to ship secure e-signing and document annotation workflows using React, Material UI
- Implemented strict authentication, authorization, and application security by building a Role-Based Access Control (RBAC) system using AWS Cognito and JWT
- Developed accessible, pixel-perfect UI from Figma mockups, ensuring consistent behavior across all major browsers and screens

Education

B.Tech in Computer Science and Engineering **Graduated: 2022**
APJ Abdul Kalam Technological University, Kerala
